

Drum forks - when handling horizontal drums

High flexibility and efficiency - the drum forks make it easy to carry horizontal drums or reels. Furthermore the drum forks can easily be replaced by one of the many fork options, offered by Interthor.

A wide range of optional extras for the quick shift system ensures an optimum utilization of the Trans-Positioner and Trans-Stacker - the same unit can be fitted with a spear, crane arm, platform, drum turner or reel rotator.

High quality is ensured through an extended test program and in cooperation with experts in Health and Safety.

Technical Specifications

The drum forks can lift and carry horizontal drums.

Facts about the drum forks

- drum diameter with a drum fork carriage of 32": Minimum 4" and maximum 39.5"
- drum diameter with a drum fork carriage of 27": Minimum 4" and maximum 29.5"

The drum forks can handle different types of drums, paper reels and barrels.

Strong construction ensures a long operating life and low maintenance costs.

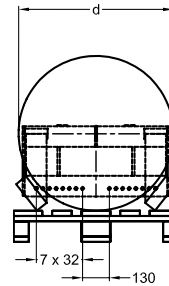

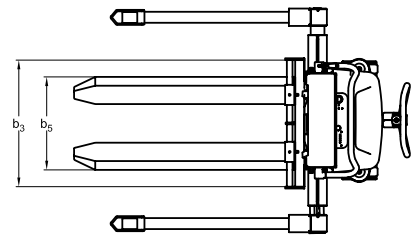

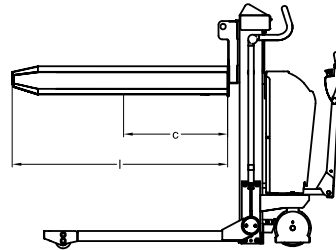

When using a TP or TS without straddle legs, the drum to be handled has to be placed on a pallet or other suitable platform.

The lifting/lowering function of the electric TP and TS models can be operated by remote control (optional extra).

Interthor offers a wide range of optional extras, e.g. spear, platform, reel rotator and drum turner.

With a width for the drum fork carriage of 27", 7 fork spans are possible (b_5).

With a width for the drum fork carriage of 32", 9 fork spans are possible (b_5).

The drum turner - an ideal alternative when lifting, turning or emptying drums.

Product (measured in inch)	TP-MS, TS-MS, TPS-MS, TSS-MS, TP-ME, TS-ME, TPS-ME, TSS-ME, TP-EE, TS-EE, TPS-EE, TSS-EE
Capacity	max. 550 lbs.
Fork length	l 23.5, 31.5, 45
Width of drum fork carriage	b_3 27, 32
Maximum drum diameter	d 29.5 by a carriage of 27 and 39.5 by a carriage of 32
Load centre	c l/2
